LEADER TO HEALTH

DOLATROX®

## WARNING LABEL

Our musculoskeletal system is the part most stimulated part of human body and many times it suffers from everyday life. Serious work activities, life style, sport injuries, overweight and obesity are all risk factors that could affect the cartilage metabolism. Preserve the articular cartilage functional and structural integrity also through supplementary feeding, as much as possible.

### PRODUCT NAME

Dolatrox®

### FORMAT AND PACKAGE

Sachets, 30 sachets. The Dolatrox® case has a patented "TAMPER EVIDENTRT" sealing system to report the product integrity. Consult our web-site for more information.

### USE INDICATIONS

Dolatrox® is a food supplement composed by MSM, ASU, SAmE, vitamin C, copper and manganese.

- » Vitamin C contributes to collagen formation for the cartilage normal function.
- » Copper and manganese contribute to normal connective tissues maintenance.

### COMPOSITION

A Dolatrox® sachet includes:

MSM Methylsulfonylmethane (2,5 g), ASU soy and avocado unsaponifiable (150 mg), SAmE (100 mg), vitamin C (250 mg), copper (from copper bisglycinate) (0,9 mg), manganese (manganese bisglycinate) (5 mg).

### COMPONENTS

- » MSM (METHYLSULFONYLMETHANE)  
It is a biologically active form of Sulphur, suitable to the mineral supplementary feeding. The Sulphur is one of cartilage tissue main components and it has a high concentration in joints in which it acts.

- » ASU (SOY AND AVOCADO UNSAPONIFIABLE)  
According to some studies, the ASU is active in collagen synthesis stimulation and it slows down the degradation process of cartilage matrix.

- » SAME (S-ADENOSYL-L-METHIONINE)  
The S-adenosyl-L-methionine (known as SAmE) is a coenzyme involved in neurotransmitter synthesis, such as serotonin and dopamine, linked to the mood and pain threshold.

- » VITAMIN C  
The Vitamin C is a water-soluble vitamin with an antioxidant role. It is essential for collagen formation, a protein required for the construction of connective tissue, ligaments and bones. It contributes to maintain the cartilage normal function.

- » COPPER BISGLYCINATE CHELATE  
The copper is an essential micro-nutrient and it contributes in many human body life processes, even though its concentration is small in our organism. It joins in many enzymes' structure in which it is a catalyst (it supports biochemical reactions). The copper contributes to connective tissue maintenance, cell protection from oxidative stress and immune system proper functioning.

- » MANGANESE BISGLYCINATE CHELATE  
As the copper, the manganese steps in connective tissues formation and it contributes to cell protection from oxidative stress. The manganese is an important mineral for bone tissue.

**The applied chelation to copper and manganese favorites their absorption.**

### USE CONDITIONS

It is advised the consumption of 1 or 2 oral sachets a day of Dolatrox®, as directed by your doctor, consuming it in an ambient temperature glass of water (about 150 ml).

## WARNINGS

Dolatrox® must be stored at ambient temperature (between 8° and 25° Celsius, 46,4° and 77° Fahrenheit) in dry and cool place. The expiry date is linked to the correctly stored product, in undamaged packages. Keep out of reach of children under the 3 years old. Do not exceed the recommended daily dose. The food supplements should not be seen as a substitute of a varied and balanced diet and a healthy lifestyle. Possible product chromatic changes must be assumed as a natural phenomenon because of the occurrence of a high quantity of plant extracts. **There are no scientific data about Dolatrox® use in pregnancy and breastfeeding. It is recommended to consult your doctor, especially during the first pregnancy quarter.**

## INFORMATION IN CASE OF FOOD INTOLLERANCE AND/OR ALLERGIES

Dolatrox®:

- » Has no gluten, and it can be taken by coeliacs
  - » Has no sodium, and it can be taken by hypertensive
  - » Has no lactose and dairy products
  - » Can be taken by vegetarian and vegan
- Don't use Dolatrox® in case of known hypersensitivity to its components.

## VALIDATIONS

### » KOSHER

This validation gives to Dolatrox® the validity to be consumed by Jewish people, according to their religion food regulations and it is expression of the highest qualitative standards about substances used during industrial processes.

### » HALAL

This validation certifies that Dolatrox® complies with Islamic doctrine, according to Sharia regulations. It is a validation based on the quality of chain and product substances.

### » MILK FREE

This validation guarantees that Dolatrox® is a product with the complete lack of milk and it is indicated for lactose-intolerant.

### » UIC

All Dolatrox® fonts in graphic image – Braille – have been checked through the "Unione Italiana Ciechi" (Blind Italian Confederation) verification, which certified the texts correctness and quality.

### » ECCELLENZA DI CASA SAVOIA

This validation guarantees that Dolatrox® is a product is a result of a research of substances, industrial materials and processes, qualified suppliers present on the territory.

### » DOPING FREE

This validation certifies that Dolatrox® does not use substances and/or ingredients present in Wada list (consult the banned substances list). The company, through a constant promotion of ethical values, wants to guarantee to clients and consumers, a permanent fight against doping substances.

## NOTA

The information included in the Dolatrox® leaflet can't and don't replace your doctor's advice, but these want to represent an orientation and consultation tool for a proper use of new modern food supplements in different conditions of use.

Patent Pending;  
Product included in the register of food supplement of the Ministry of health, cod. 69797
